

Appl. No.10/565,044; Docket No. US03 0251 US2
Amdt. dated November 30, 2006
Response to Office Action dated October 31, 2006

REMARKS/ARGUMENTS

Applicant appreciates Examiner's acknowledgement of allowable subject matter in claims 13-16.

Claims 2-16 remain pending in the application.

Please cancel Claims 2-11 without prejudice.

In response to the Office Action's drawing objections, Applicant respectfully traverses, in that the Specification and drawings submitted in the previous Office Action Response provides sufficient enablement and complies with the Federal Circuit's holding that "the specification must teach those skilled in the art how to make and use the full scope of the claimed invention without 'undue experimentation'." *In re Wright*, 999 F. 2d 1557, 1561, 27 USPQ2d 1510, 1513 (Fed. Cir. 1993). Furthermore, not everything necessary to practice the invention need be disclosed. *In re Buchner*, 929 F.2d 660, 661, 18 USPQ2d 1331, 1332 (Fed. Cir 1991). All that is necessary is that one skilled in the art be able to practice the claimed invention, given the level of knowledge and skill in the art. Further, the scope of enablement must only bear a "reasonable correlation" to the scope of the claims. See, e.g., *In re Fisher*, 427 F.2d 833, 839, 166 USPQ 18, 24 (CCPA 1970).

The Specification has been amended in response to the Examiner's observations. Applicant believes that the terminology of "conductive bonds" is sufficiently defined.

With these claim amendments, the rejections raised in the Office Action are now moot. Claims 13-16 are now allowable.

Applicant believes he has addressed all of the Examiner's concerns. A timely Notice of Allowance is earnestly requested.

Please charge any fees other than the issue fee and credit any overpayments to Deposit Account 50-4019.

Respectfully submitted,

Date: 30-NOV-2006
